

OUR INVENTORY

Catastrophic failure? We've got you covered!

Have you ever had a customer send you a failed motor that is beyond economic repair? If so, that's where The Pump & Motor Works can help!

- With an inventory of over 2 million horsepower in stock of horizontal and vertical motors, there isn't an application we can't match.
- Whether it be a like-for-like or bolt-in replacement, we have options to get your customer back up and running.
- Our experienced customer service representatives are on stand-by 24/7/365.
- We will walk you through every aspect of sizing the application, and take the stress out of scrambling for last-minute options.

Call (918) 752-0309 today to find out more!

Be sure to visit us during the EASA local chapter conference in Tulsa on April 28th and 29th!

LASER-CUT LAMINATIONS

Call us today for your stator and rotor lamination needs! Our Trumpf L2530 Plus offers a unique part nesting capability, resulting in very little wasted material. Laser cutting laminations is an excellent alternative to having them stamped because the laser holds tolerances of +/- .005". This precision control means we don't have to sand down burring often found in stamped laminations - resulting in shorter lead times!

GOT SURPLUS?

We're buying!!!

Since 1991, PMW has focused on both supplying **and** purchasing large industrial equipment to improve capabilities and better provide for our customers. Our nearly 2 million horsepower inventory includes machines ranging from 100 to 30,000 horsepower, and includes squirrel cage motors, wound rotor motors, synchronous motors, various pumps, primary starters, and liquid rheostats. **Take a look at two of our most recent acquisitions...**

PMW is a recognized distributor for

Westinghouse Circulator Pump Motor from Vermont Nuclear Station

- **Never Installed!**
- CS 62.5 Frame
- 1250 HP
- 356 RPM
- 4000 V
- WP-II
- Kingsbury Fluid Bearings

Application:
Circ. Water
Pump

GE Condensate Booster Pump Motor from Crystal River Nuclear Station

- **3 NEW Units In Stock!**
- 8557 P70 Frame
- 2500 HP
- 1200 RPM
- 4000 V
- WP-II
- Fluid Bearings

Applications:
Cooling Tower
Pump, High flow-
low head turbine
pumps
